

BASIC CONCEPTS, INC
Press Release

March 31, 2009
Anderson, SC

When the US Army asked for an flexible fabric storage tank that was easily assembled for use in fire fighting missions, Basic Concepts answered with the Sentry Quick Tank.

The Sentry Quick Tank is an open top, frame supported portable tank that allows the tank liner bottom to conform to unimproved setup locations while supporting the column of water on slight grades.

The Sentry Quick Tank's primary uses are for when water pressure is low or a substantial water volume is needed for firefighting. The Quick Tank is designed to be used with helicopter lift buckets or pumper trucks. Other uses for the Quick Tank include temporary storage of non-potable water or petroleum spills clean up.

Quick Tanks are available in a variety of materials to meet your portable water storage and or fuel storage tank needs. Quick Tanks are available in customized tank sizes to meet your specific requirements up to 5000 gallons and are assembled in less than 10 minutes by two individuals.
