

Flexible Onion Tanks

Essential for Military Units

Flexible onion tanks provide an indispensable solution for military units, offering a portable and easily deployable method to store large quantities of water for drinking, hygiene, and field operations. These robust tanks are particularly valuable in remote or challenging locations where access to clean water is limited, ensuring that warfighters have a continuous supply of safe drinking water and sanitation facilities.

Designed for simplicity, these tanks require no specialized equipment for setup, allowing for rapid deployment in emergency situations or temporary applications. When filled, the tanks expand to full capacity, optimizing storage within a compact footprint while remaining self-supporting.

Alternate Uses

Designed for versatility, onion tanks are not limited to military use. Emergency response organizations rely on them for firefighting, flood control, and disaster relief, while construction sites use them for dust suppression and concrete mixing. Agricultural operations also benefit from onion tanks, using them to store water for irrigation and livestock.

Dependable Performance

With their flexible and practical design, onion tanks provide reliable water storage solutions in diverse and demanding environments. Ensure your team stays hydrated and ready for any challenge with the trustworthy performance of flexible onion tanks.

Key Features:

- **Convenient Connections:** Equipped with 2" male and female cam-lock fittings for easy and secure connections, with custom valve configurations available to meet specific needs.
- **Protection:** Includes a ground cloth for rugged terrain protection, which also functions as a carrying bag
- **Security:** Water-tight zipper top ensures a secure environmental seal for safe portable water storage
- **Durability:** Constructed from robust urethane fabric to withstand harsh conditions and repeated use
- **Safety:** Tanks and ground cloths are marked as source or waste to prevent cross contamination
- **Capacities:** Available in 1000- and 3000-gallon sizes for various water storage needs
- **Versatility:** Deployable on slopes up to 10%, enhancing usability in uneven terrains
- **Easy Maintenance:** Repair kit included for quick and easy maintenance
- **Compliance:** Meets ATPD 2344 military specifications

Flexible Zipper-Top Onion Tank Models Ordering Information

Capacity	Model	Type
1000 gallons	7002-05425-305-PWT	Source
1000 gallons	7002-05425-305	Waste
3000 gallons	7002-05383-305-PWT	Source
3000 gallons	7002-05383-305	Waste
