## A Wide Range of Engineered Secondary Containment Solutions

At BCI, we protect where the world works. We offer a comprehensive range of secondary containment solutions across many applications, tailored to meet your specific requirements and industry needs. The regulations surrounding environmental containment can be complex. We will guide you into compliance—and help keep you there.

### Table of Contents

#### Spill Containment

Flexible Containment Berms .....	5-8
Bulk Storage Containment .....	9-11
Light-Duty Containment Berms ...	12-15
Drip / Small Leak Containment ....	16-19
Oil Spill Containment .....	20-21
Structured Spill Containment .....	22-26

#### Personnel Safety

Workspace Barriers .....	27
Noise Barriers .....	28-29

### How to Order

**Phone:** 1-800-285-4203 **Fax:** 1-864-224-7063

*Monday through Friday 8 a.m. to 5 p.m. Eastern Standard Time*

# Choices for Different Applications

Flexible geomembrane liners provide protection from exposure to oils, fuels, and chemicals. Choose the BC material that best meets your application—ranging from light-duty, to moderate, to exceptional performance. Consider the attributes below when choosing the product that matches your specific need.

Geomembrane Liner	BC 1	BC 2.8	BC 3	BC 4	BC 5
	MATERIAL	MATERIAL	MATERIAL	MATERIAL	MATERIAL
Star Rated: 5 = BEST					
Abrasion resistance	★	★★	★★★	★★★★	★★★★★
Puncture resistance	★	★★	★★★	★★★★	★★★★★
Tensile/tear strength	★★	★★	★★★	★★★★	★★★★★
Temperature range	★★	★★★★	★★★★	★★★	★★★★★
Chemical resistance - petroleum based	★★	★★★	★★★★	★★★★	★★★★★
Chemical resistance - general acids	★★★	★★★★	★★★★★	★★★★★	★★
UV resistance	★	★★	★★★★	★★★	★★★★★

## Proper secondary spill containment practices offer these benefits:

- Captures dangerous spills
- Protects the environment
- Reduces slip and fall accidents
- Reduces hazardous clean-up costs
- Avoids costly fines
- Complies with regulations

## Rigid-Lock QuickBerm®

Versatile, drive-in secondary spill containment for safety, regulatory compliance, and environmental stewardship

- Fast and easy setup in minutes, no assembly needed!
- Single-piece construction—patented Rigid-Lock wall-support system integral to berm provides unobstructed work space.
- Stainless steel brace supports lock the walls at a full 90° for secure, strong structural integrity—no sagging.
- Sidewalls lower quickly for easy drive-in and out.
- Flexible, durable geomembrane liner withstands a broad range of chemicals including petroleum, oils, grease, and most acids.
- Reinforced CriticalCorner™ design features wraparound diagonal radio frequency (RF) welds to prevent seam leaks and extend berm life expectancy.
- Top rim of walls finished with a 1-in (25-mm) hem for added strength.
- Each brace support includes a Rigid-Lock base with integrated hole for optional anchoring.
- Folds down for easy portability, permits immediate spill response.
- Reliable, 100% leakproof protection helps comply with EPA for containment and spill prevention (SPCC).
- Excellent puncture and abrasion resistance—choice of materials to accommodate light- to heavy-duty work requirements.

Use Rigid-Lock QuickBerm® to capture potential spills when dispensing from an IBC.

### Ideal for:

- |                   |                                       |                   |
|-------------------|---------------------------------------|-------------------|
| • Vehicles        | • 55-gallon drums                     | • Pumps           |
| • Tankers         | • Intermediate bulk containers (IBCs) | • Air compressors |
| • Heavy equipment | • Generators                          | • Pillow tanks    |
|                   |                                       | • Storage tanks   |

**No assembly needed—saves time, ready in minutes!**

Ready in minutes!

1  
Unfold berm, with supports in flat position.

2  
A simple tug locks supports in upright position.

Fully deployed for quick spill readiness!

# Rigid-Lock QuickBerm® offers unmatched performance

1. One-piece, no assembly needed. Unfold into a 90° locked position—brace support withstands wind loads of 40 miles per hour.
2. Stainless steel brace support is encased in a durable Rigid-Lock base that features an integrated hole for optional anchoring.
3. CriticalCorner™ wraparound design prevents seam leaks for fluid-tight reliability.
4. Supports resist extreme temperatures of -50° to 160°F (-45.5° to 71.1°C). Capable of withstanding any wheeled vehicle weight.
5. Drive-through at any angle.
6. Folds down for compact storage in a vehicle or in your facility for quick access.

## Different materials, different applications

**BC 2.8**  
MATERIAL

Suitable for infrequent drive-in or -out scenarios, pedestrian traffic, and for placing heavy materials within the working space

**BC 3**  
MATERIAL

*Most Popular*

More durable and thicker, suitable for more frequent drive-in or -out applications

**BC 5**  
MATERIAL

Highest tensile strength, abrasion and puncture resistance for frequent drive-in or -out applications in extreme cold temperatures

**HELPS YOU COMPLY**  
**EPA & SPCC**

Note (1): For exterior dimension, add 8-in (203-mm) to width and length to account for support and hub. Note (2): When selecting a berm size, allow 12-in (305-mm) at entry or exit for lowering and raising the wall.

**⚠ WARNING:** This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm, and nickel, which is known to the state of California to cause cancer. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

## Customize your Rigid-Lock QuickBerm®

- Size: any length, any width.  
Wall heights of 8- or 12-inch  
(203- or 305-mm)
- Shape
- Integrated protection mats

**CUSTOM  
DESIGN  
AVAILABLE**

Rigid-Lock QuickBerm® provides compliant secondary containment with standard sizes offering capacities ranging from 175- to 5,236 gallons (662- to 19,820 liters).

### **Need something larger or have a unique requirement for your business?**

With our custom design program, our experienced, knowledgeable sales and engineering staff will create a solution to meet your specific need.

*Learn more about our custom program on page 31.*

Custom sizes to fit a space or specific vehicle.

Convenient, integrated protection mats.

**Call us today at 800-285-4203 for a free consultation  
to help solve your spill containment issue.**

# Accessories for Rigid-Lock QuickBerm®

## Ground and Track Berm Guards for All Drive-Through Berms

Improve berm longevity without sacrificing functionality

- Use ground mats under berms to create a smooth, uniform deployment area. Heavy-duty woven fabric improves wear resistance.
- Use track mats inside berm for extra protection along tire paths. Thick, durable black woven fabric protects floors and walls from abrasion caused by skidding, turning, and braking.
- Available in heavy-duty coated polyester, or economical, lightweight coated vinyl for infrequent use.

**CUSTOM  
DESIGN  
AVAILABLE**

*Custom built for the application—  
contact a sales representative for more information.*

Track and ground mats improve wear resistance and extend the life of your berm.

Custom welded-in track mat.

## HFF Oil Stop Valve Berm Drain Kit

Filters rain water to remove hydrocarbons to a non-detectable level

- Filters all organic hydrocarbons to <5ppm; effluent will be at non-detectable levels.
- Removes sheen, gasoline, diesel, transmission oil, refined oils, and other volatile organic compounds—will not drip or leach out.
- Automatically shuts off in the case of a major hydrocarbon release.
- Low maintenance required when used with a reusable pre-filter to catch debris, silt, dirt, paper, limbs, etc.

Description	Model No
Berm drain with hydrocarbon filter oil stop valve	9001-04436

## Berm Repair Kits

Repair berm on the fly or in the field

- Berm repair kit contains everything needed to re-seal berm in the event of a tear
- Included heat gun ensures tears are sealed seamlessly and without leaks
- Ideal for small to medium tears

Description	Model No	CA Prop 65
Deluxe repair kit for BC1 - BC4 liner materials	1090-00101-RKT	⚠
Deluxe repair kit for BC5 liner material	1090-00101-PKT	⚠

**⚠ WARNING:** This product can expose you to chemicals including toluene, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Outside Support QuickBerm®

## Quick and easy setup for temporary spill containment

- Provides the protection of the QuickBerm, with outside support braces.
- Counterbalanced outside locking supports ensure rigid upright walls, even in windy conditions.
- One-piece design deploys quickly—no assembly, no inflation, no plastic feet to cause premature berm floor wear.
- Reinforced CriticalCorner™ design features wraparound diagonal welds for superior strength and fluid-tight reliability.
- Can be staked into position through grommets at each support position.
- Sides fold down to allow pallet jacks, forklifts, and dollies to be driven into and out of the containment.
- Braces lay flat for drive-in with no breakage from tires.
- Durable fuel and chemical resistant geomembrane liner.
- Folds down into compact size for easy transportation and storage.
- Custom sizes available.

Position wall support upright and lock flap into place.

## Angle Bracket QuickBerm®

Economical secondary spill containment—suitable for stationary containment needs

- Best for applications with limited need to vehicles drive in/out, such as storage for transformers, generators, metal/poly tanks, IBCs, oiling/refueling operations, and more.
- Arrives folded for easy shipping—assemble by simply slipping angle brackets into slots.
- Angle L-brackets provide sturdy sidewall support—in steel or aluminum.
- Top 1-inch hem adds strength and prevents wall sag—reinforced corners for 100% containment.
- Fuel and chemical-resistant geomembrane liner.
- Custom sizes available with walls from 18- to 24-inch high.

**CUSTOM  
DESIGN  
AVAILABLE**

Affordable spill containment for small- to big-scale applications.

Angle L-brackets slip into protective pockets to keep walls upright, no sagging.

## High-Wall Berm

Highly flexible spill control berm that contours to uneven terrains—suitable for stationary containment needs

- Best for applications with limited need to drive in/out, such as storage for transformers, generators, metal/poly tanks, IBCs, oiling/refueling operations, and waste materials.
- Independent, 3-feet (0.9 m) tall all aluminum quick-set A-frame supports allow adjustment to grassy, hilly, bumpy surfaces.
- Deploys in field in less than an hour with 5 people, no tools required.
- Rugged geomembrane liner for excellent abrasion, puncture, and chemical resistance.

*Custom built for the application—  
contact a sales representative for more information.*

*Most  
Popular*

**HELPS YOU  
COMPLY  
EPA & SPCC**

**CUSTOM  
DESIGN  
AVAILABLE**

High-wall berm provides secondary containment for horizontally- or vertically-stored metal or poly tanks.

No tools needed to assemble. Securely attach liner portion of the berm to the aluminum A-frame supports which are spaced four feet apart.

Custom-size a high-wall berm to fit your unique application (shown here: 20-ft wide x 32-ft long).

# Rigid-Lock QuickBerm® Lite

Versatile, on-the-go spill containment!

- Lightweight—folds down to a small size for storage in trucks, emergency vehicles, and spill kits.
- Portable, one-piece design sets up fast and easy.
- Unobstructed 100% leakproof sump captures spills from saddle tanks, hydraulic lines, pipes, batteries, machinery, and drums.
- Tough geomembrane liner provides broad UV and chemical resistance.
- Patented Rigid-Lock walls with stainless steel braces lock at 90° for strong structural integrity.
- Durable engineered nylon hub accepts optional anchors for use in windy conditions.
- Add optional grates for use as a decon station or to lift containers above contaminated liquid.

Use for personnel decontamination.

**CUSTOM  
DESIGN  
AVAILABLE**

## Many uses:

- Damaged saddle tanks
- Emergency decon station
- Leaky containers
- Hydraulic leaks and breaks
- Battery or transformer storage
- Refueling overfills

Capture spills from leaky equipment.

## Ready in 2 quick steps!

1 Simply unfold berm with supports in flat position.

2 A simple tug locks wall in upright position.

One piece, no assembly needed or parts to lose. Fully operational in just minutes!

Capacity Gallons/Liters	Dimensions W x L x H		Model No	Ship Wt lb/kg	CA Prop 65
	Interior	Folded			
79/299	4 ft x 4 ft x 8 in 1.2 m x 1.2 m x 203 mm	16 in x 12 in x 5 in 406 mm x 305 mm x 127 mm	1054-03654-106	13/5	⚠

Note (1): For exterior dimension, add 8-in (203-mm) to width and length to account for support and hub.

Note (2): When selecting a berm size, allow 8-in (203-mm) at entry or exit for lowering and raising the wall.

⚠ **WARNING:** This product can expose you to chemicals including diisononyl phthalate and lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

## Rigid-Lock Decon

Deploys in seconds—one berm handles multiple decontamination zones simultaneously

- Durable geomembrane liner with patented interior walls form multiple zones for different solutions.
- 2, 3, or 4 washdown zones—one ¾-in GHT (garden hose thread) drain fitting per zone.
- Use optional grating to keep personnel above the fluid.

Multiple interior walls, each with inside brace support system, enable you to accommodate up to four separate solutions at the same time.

## Decontamination Shower Berm Kit

Portable decon station helps prevent environmental contamination

- Quick and easy setup of berm, tent and shower.
- Collapsible tent enclosure keeps spray contained while contaminants drip down into the berm.
- Includes 2-stage decontamination berm with drain port at each zone for easy disposal of liquid waste.
- Included 110V pump aids draining of waste from active section of berm.
- Decon grating in each section of berm keeps users elevated above harmful liquids.

Included shower connects to standard garden hose and delivers more than 2.5 GPM of flow from two nozzles.

## Make-A-Berm™ Custom Spill Containment

Keep leaks contained—custom berms to fit the application, shape, or environment

Make-A-Berm spill containment is made to fit your application, indoors or out. It's easily installed with no need to move existing equipment—install around difficult-to-move equipment, in spill-prone areas, or areas where a standard shape berm won't fit. Make-A-Berm components are modular, versatile and customizable to fit your layout. For a liquid-proof seal, install with the recommended adhesive/sealant.

Make-A-Berm walls are flexible and crush-resistant, with foam inserts that return to their original shape with no memory loss after foot traffic or hand truck equipment. Wall exteriors are made from non-absorbent, modified PVC-coated fabric that resists oils, gasoline, acids and other liquids. Heavy-Duty Make-A-Berm uses a heavier PVC-coated fabric along with aluminum mounting strips to increase wear resistance—ideal for utility vehicle and forklift traffic.

- Durable, semi-permanent containment for spills and leaks around equipment and machinery.
- Made to fit—50-ft kit includes necessary pieces to create a common containment solution.
- Versatile system lets you choose the pieces you need to create a custom shape or size—mix standard and heavy-duty pieces for a fully customized solution.
- Bright, high-visibility colors increase safety in traffic areas.
- Heavy-duty berm withstands heavy vehicle traffic—flexible foam inserts bounce back to shape.
- Helps to comply with EPA for containment and spill prevention (SPCC) regulations.

Make-A-Berm contains oils, gasolines, acids and other liquids.

Heavy-Duty Make-A-Berm is ideal for vehicle and forklift traffic.

Available in four sizes: 1.5- and 2-in berms are ideal for small to medium capacity containment, 4- and 6-in sizes for larger containment needs.

### Simple, Easy Installation

Use adhesive/sealant to install berm sections to the floor, creating a liquid-proof barrier.

Vinyl cement connects sections together—use to link two sections, attach corners and drain plug.

## Create a Custom Make-A-Berm™ Containment Solution

Connect multiple berm pieces to fit your containment area, no matter the shape or size. Standard and heavy-duty components are interchangeable for a fully customizable, durable solution. For best results, use on a dry, smooth surface with the recommended adhesive.

Convenient kits include everything needed for a common spill containment solution.

Straight Sections can be linked together or combined with corners for a liquid-proof containment solution. Easily cut to size with a utility knife.

Corners join two sections at an angle. Connect to either standard or heavy-duty straight sections.

Vented Corners release air when berm is compressed to prevent damage—ideal for wheeled traffic.

Vertical Corners attach flush to a wall or other vertical barrier, for fully-sealed containment on walls or vertical machine areas.

Drain Plug lets you easily drain innocuous fluids, such as rain or snowmelt. Add to any part of the berm, avoiding vehicle or hand truck traffic areas to prevent damage.

Sili-Thane® 803 Adhesive and Sealant creates a leakproof installation to dry and clean floors.

Vinyl Cement bonds multiple pieces together for a liquid tight seal.

# Spill Pads and Spill Pads HD

Roll-over sidewalls for easy leak containment or washdowns

- Encased urethane foam soft sidewalls for use with drum dolly—springs back into place with no memory loss.
- No assembly required—simply unfold for instant use in shop or field.
- Standard models constructed with lightweight, durable geomembrane liner that resists the harshest of liquids, including petroleum, oils, greases, and most acids.
- Heavy-duty (HD) models feature heavy-duty vinyl designed for increased vehicle traffic, ideal for maintenance applications.
- Available in 2- or 4-inch high walls to contain minor leaks and spills.
- Corner grommets allow anchoring in place.
- Optional grates keep containers above spills (see page 13).

Roll-over sidewalls offer easy drum placement—foam walls quickly spring back for secure containment.

HD models capture spills from small vehicles and heavy equipment with convenient drive-in access.

Heavy-duty vinyl stands up to increased traffic from forklifts and small vehicles.

## Drip Berms

Capture small oil leaks and drips before they contaminate the ground or create unsafe work surfaces

- Lightweight, flexible and portable—use to catch drips from leaky vehicles, industrial machinery, hydraulic lines, pipes, and drums.
- Replaceable, oil-only sorbent within a welded, leakproof barrier—reusable outer shell with refill packs available.
- Patented, coated mesh outer layer traps coarse debris.
- Chemical-resistant, durable geomembrane liner—rated for drive-over applications.
- Brass grommets in opposing corners accept anchor stakes (not included)
- Two sizes; extended model with weighted bottom holds berm in place in winds up to 50 mph.

Regular Drip Berm  
21-in x 23-in.

Extended Drip Berm 24-in x 36-in.

## Pop-Up Pools

Economical, portable spill containment  
deploys instantly

- Use to catch leaks and spills from punctured saddle tanks, leaking drums, blown hydraulic lines.
- Lightweight, on-the-go spill control folds easy for storage in vehicles, on shelves, near shipping docks.
- Embedded foam ring top raises wall as fluid level increases.
- Durable geomembrane liner for reliable seam adhesions and chemical and abrasion resistance.

Bright safety yellow color  
for quick visibility. Sizes up  
to 150 gallon capacity.

## Ceiling Leak Diverters

Economical way to respond quickly to roof leaks and protect your equipment and inventory from water damage

- Economical way to respond quickly to roof leaks and protect your equipment and inventory from water damage.
- Avoid downtime after a roof leak and keep floors dry and safe from slip accidents.
- Durable, puncture resistant and watertight geomembrane liner for long life.
- Accepts a standard garden hose to channel overhead pipe and ceiling leaks to container or floor drain—flow rate of 3.3 gal/min (12.5 L/min).
- Constructed with cinched corners for quick and easy installation.
- Available with high strength magnets for steel rafter attachment, or grommets for bungee or zip tie attachment.

## Water-Filled Drain Covers

Ensure compliance to storm water regulations and prevent run-off pollutants from entering drains

- Seal drains before washdowns, maintenance, or other clean up tasks to prevent contaminants from going into water systems.
- Easy-fill push plug accepts standard water hose—do not fill over 5-in (127-mm) high.
- Long lasting, durable geomembrane liner resists damage from UV rays.

## Waterproof Tarps

Protect drums and equipment to avoid contamination or damage

- Use under berms for extra puncture- and wear-resistance.
- Waterproof geomembrane liner vinyl coated fabric provides protection from direct sunlight, sand, dust, and rain.
- Brass grommets in corners offer a convenient way to secure the tarp in place.

## Oil Solidifying Polymers

Turns liquid hydrocarbons into a solid mass on contact

- Proprietary blend of USDA food-grade polymers that are non-toxic, non-corrosive, non-carcinogenic, and non-hazardous.
- Forms a molecular bond to solidify hydrocarbons into an inert, solid, rubber-like mass, while also suppressing harmful vapors.
- Works on a full spectrum of hydrocarbons ranging from low-end gasoline to heavy crude oil.
- Once solidified, hydrocarbons cannot leach out—dispose of solid in most landfills as non-hazardous waste.
- Byproduct is recyclable and can be used as raw material for asphalt, rubber and plastic production, or can be burned as fuel.
- Tested as non-harmful to aquatic plant and animal life and waterfowl.
- BCI Solidifying Polymer is listed on the EPA National Contingency Plan Product Schedule as a "Solidifier" for use on oil spills in the navigable waters of the United States.

Description	Model No
10 lb loose granules in a 6.5 gallon pail	CIA010
50 lb loose granules in a 30 gallon drum	CIA050
100 lb loose granules in a 55 gallon drum	CIA100
200 lb loose granules in a 95 gallon drum	CIA200

## Rapid Spill Response Kits

Portable, quick-response kits for oil spills

- Includes BCI Hydrocarbon Solidifying Polymers in convenient, portable kits.
- Designed for quick, effective response to oil spills on land and water.
- Portable bag is small enough to tuck behind seats of vehicle or in storage areas.
- Once solidified, polymer, booms and pillows can be disposed of in landfills as non-hazardous waste.

Description	What's included	Model No
Portable spill response bag	10 lb bulk polymer in 2 x 5 lb bags (1) Quick Deployment Boom, 2" x 12 ft (1) Hydrocarbon Solidifying Pillow, 12" x 12" (4) Pads, 15" x 19" (1) Disposal bag and (1 pair) Chemical resistant gloves	CIA200
Portable bucket system	10 lb bulk polymer in 6.5 gallon pail (1) Quick Deployment Boom, 2" x 12 ft (1) Hydrocarbon Solidifying Pillow, 12" x 12" (1) Disposal bag (1) Scoop (1) Respirator mask (1 pair) Chemical resistant gloves	ER-HMS
30 gallon overpack system	25 lb bulk polymer in 30 gallon DOT-approved overpack (1) Quick Deployment Boom, 2" x 25 ft (4) Hydrocarbon Solidifying Pillow, 12" x 12" (2) Disposal bag (1) Scoop (1) Respirator mask (2 pair) Chemical resistant gloves	ER-HM30
55 gallon overpack system	50 lb bulk polymer in 55 gallon DOT-approved overpack (1) Quick Deployment Boom, 2" x 50 ft (6) Hydrocarbon Solidifying Pillow, 12" x 12" (3) Disposal bag (1) Scoop (1) Respirator mask (2 pair) Chemical resistant gloves	ER-HM55
95 gallon overpack system	100 lb bulk polymer in 95 gallon DOT-approved overpack (2) Quick Deployment Boom, 2" x 50 ft (12) Hydrocarbon Solidifying Pillow with loop, 12" x 12" (4) Disposal bag (2) Scoop (2) Respirator mask (2 pair) Chemical resistant gloves	ER-HM95

# Hydrocarbon Solidifying Booms and Bilge Bags

## Spill containment devices for hydrocarbon spills in water or on land

- Proprietary blend of hydrocarbon solidifying polymers bonds with hydrocarbons.
- Polymer granules solidify on contact—hydrocarbons will not leach out.
- Reusable until the polymer has fully solidified—simply rinse dirt and debris from the surface and redeploy as needed.
- After solidifying, the boom can be disposed of in most landfills as non-hazardous waste.

### Sheen Booms

- Collect sheen and hydrocarbons from the surface of water where there are issues with currents and/or wind.
- Constructed from a high tensile screen that allows hydrocarbons to enter the boom.

### Quick Deployment Booms

- Lightweight and flexible spill containment device for hydrocarbon spills on both land and water.
- Ideal for spills in calm waters such as marinas, harbors, retention ponds and underground storage tanks.
- Excellent tool to protect storm drains from fuel spills when used on land.

### Marine Booms

- Designed to be used in any area where oily water is present, such as in oil-water separators, retention or containment structures, and utility vaults or manholes.
- Appropriate for marine spills in water with or without currents.
- Can be used to prevent hydrocarbons from entering storm drains on land.

### Bilge/Marine Pillows

- Ideal for removing sheen and oil from bilges of recreational or commercial vessels.
- Proprietary formula used in the pillows is slower acting but allows for visual inspection of bilge for removal of spent pillow as polymers increase in size.
- Also ideal for use in oil-water separators, retention or containment structures and utility vaults or manholes.

Description	Size	Model No
Sheen Boom	3 in dia x 25 ft long	SB3X25WC
	3 in dia x 25 ft long with rope	SB3X25WCR
Quick Deployment Boom	2 in dia x 12 ft long	QDB012

	3 in dia x 5 ft long with loop	MB103
	3 in dia x 10 ft long with loop	MB100-05
Bilge/Marine Pillow	6" x 6" with 1 oz oil solidifying polymer. Pack of 50.	MP6-01
	12" x 12" with 8 oz oil solidifying polymer. Pack of 20.	MP12-01

# Hydrocarbon Detection Strips

## Simple and proven oil detection

Quickly and accurately determine the presence of hydrocarbons in water. Simply dip into a liquid sample and the light blue strip will turn dark blue if hydrocarbons are detected; the color intensity and size of the darker area are indicators of the quantity of hydrocarbons in the sample. If the sample contains no hydrocarbons, the strip will not moisten or discolor.

- Ideal for detecting contaminated water in elevator shafts, underground utility vaults and manholes, retention and secondary containment vessels, and out-fall on oil-water separators prior to pumping out the water.
- Strip measures 2.75" x 0.75" and comes in a hard plastic container.

Description	Model No
Hydrocarbon detection strips, 2.75" x 0.75". Pack of 100.	HDS100

The Hydrocarbon Detection Strip turns a darker blue when hydrocarbons are present.

Accumulation Centers and Ramp

Combine units to create your own customized spill-control system

Low-profile centers only measure 5½-in (140-mm) high for easy handling of drums. Made with 100% recycled polyethylene, these accumulation centers are nearly impervious to chemicals, including acids and corrosives. Seamless construction eliminates leaks, making them ideal for drum filling and dispensing operations. Self-locating grates won't ride up, and are removable for easy cleaning. Combine 2-, 4-, 6-, and 8-drum modular units to create your own customized system. Use the optional joining clips to firmly lock units together. Sumps remain separate and clips can be removed for easy repositioning. The 6- and 8-drum center models are EPA compliant, support SPCC, and meet NFPA 1 2009 edition and IFC fire codes.

Use optional Sump-to-Sump™ drain kit (includes joining clips and transfer tube) for applications requiring a continuous sump. Kit allows you to join centers together, on-site, for full compliance with regulations when sump capacities reach 71-gal (270-L). Kit includes one pair stainless steel joining clips, one pair rubber grommets, one polytetrafluoroethylene (PTFE) transfer tube. (Patent No US 6,622,879,B1)

Companion Ramp

Load and unload heavy drums with ease. Anti-skid ribs provide maximum safety. Place the ramp anywhere on accumulation centers size 2-drum or larger.

# Spill Control Pallets

Keep workers safe from accidental slips indoors and avoid costly hazmat cleanup costs

- Protect against ground contamination.
- Comply with EPA and avoid potential fines.

Made of molded 100% recycled polyethylene, these pallets resist chemical attack from hazardous acids, caustics and solvents. The oversized sump holds the contents of up to a 55-gal (200-L) drum in the event of leak or rupture – meeting or exceeding the most stringent spill containment regulations. Seamless construction eliminates leaks. Self-locating grates lift off for quick cleanup. Black color hides grime and dirt to keep your workplace looking clean. Choose from square or in-line configurations. EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

**IBC Pallet and Shed**

Reliable spill protection  
and safe storage for IBCs

- Compliant storage for popular 275- or 330-gal (1000- or 1250-liter) IBCs.
- Compact footprint with ergonomic working height.

Constructed of durable 40% recycled polyethylene, these intermediate bulk container pallets offer excellent chemical resistance. They accept IBCs up to 48-in W x 48-in D x 53-in H (1219-mm W x 1219-mm D x 1346-mm H). Large leakproof sump exceeds regulations and protects against high-volume spills.

Sturdy pillar supports accept up to 9,000-lb (4082-kg) uniformly distributed load.

Removable pillars make for easy sump cleanup. Pallet features forklift pockets for relocation when empty. Ships fully assembled.

EPA compliant, supports SPCC, and meets OSHA.

# DrumSheds™

## Safe, secure, and compliant outdoor storage for drums

Weather-resistant DrumSheds™ are made of eco-friendly, 50% recycled polyethylene. Convenient roll-top doors allow access from front or rear. A wide, 52-in (1321-mm) door opening accepts palletized loads. Fully compliant, leakproof pallet sump has removable, durable deck grating for easy cleanup of spills. A spacious interior offers ample headroom for adding funnels or pumps. Safety features include grounding capability, integral anchor bolt locations for wind resistance, and molded lugs to accept padlocks for security. Forklift pockets at the front and back make it easy to relocate empty sheds. Ships fully assembled. Pallets (without shed) also available.

**Low Line Pallets** (without shed) also available. Two-drum and 4-drum sizes feature ergonomic, low 9-in (229-mm) working height.

EPA compliant, supports SPCC, and meets OSHA.

Spill Trays

Lightweight and low-profile design for small-scale spill control

Made of 100% recycled polyethylene, these eco-friendly spill trays will not rust or corrode. Raised rib bottom adds rigidity and keeps contents out of spills—perfect for pouring and filling applications. Rated for service temperatures between -30° to 120°F (-34 to 49°C).

9015-03144-802

9015-03142-802

9015-03145-802

9015-03141-802

9015-03143-802

Spill trays help keep incidental spills and leaks safely contained until you can properly deal with the waste. In areas that work with larger amounts of hazardous substances, spill trays are a valuable secondary or tertiary component of overall spill containment measures.

# Personal Workspace Cough and Sneeze Guards

## Help maintain social distancing and physical separation at workstations

When social distancing cannot be maintained but operations need to continue, Cough and Sneeze Guards provide needed protection in office environments, manufacturing facilities, hotels, restaurants, retail businesses, public buildings and more.

- Personal barriers offer protection from sprays, splashes and direct respiratory droplets to limit exposure to contaminants
- Designed to maintain workplace efficiency—easily move as needed to provide a barrier at counters, desks and work areas
- Eliminate the need to change or spread out workstations—clear PVC lets you interact with others while still physically separating
- Extruded aluminum frame with flexible PVC panel is durable yet lightweight
- Clean with soap and water or disinfectant solution (ammonia-based cleaning products not recommended)
- Easy to assemble with included zip ties (user supplied mallet required)
- Made in the USA
- Custom sizes available

# QuietSite™ Noise Reduction Barriers

## Stop noise at the source

QuietSite barriers combat noise by absorbing and reflecting the sound, reducing the perceived noise level (dBA). Our noise reduction barriers are modular, versatile and easy to install. Each basic panel is fitted with brass eyelets with grommets, while premium panels include hook and loop fasteners and magnets for a seamless, secure link between panels.

- Unique acoustic core absorbs noise and vinyl outer layer reflects noise
- Foldable design for easy transportation and storage
- Quickly and easily assembled by one person
- Fire-resistant: Meets NFPA 701 Method 1
- UV protected, water resistant and durable to stand up to harsh weather
- Mount on standard link fence, scaffolding, or steel frame
- Basic panel include grommets for simple installation
- Premium panels feature hook and loop fasteners and magnets—eliminates gaps when overlapping panels
- Ideal for both indoor and outdoor use

### Find out more

Scan the QR code to watch the video

## Decibel Levels and Workplace Safety

The decibel value, or dBA, is an expression of the relative loudness of sound as perceived by the human ear. Normal conversation is approximately 60dBA; a food blender is approximately 90dBA. Each increase of 10dBA doubles perceived sound, so 80dBA may seem twice as loud as 70dBA, and four times as loud as 60dBA.

Noise in the workplace (occupational noise) poses a safety risk to work crews, but also affects the public near job sites. Excessive noise not only damages hearing, but it also creates a distracting work environment that may lead

to other safety issues. Businesses and individuals must comply with federal, state and local ordinances to control noise, and non-compliance can result in costly fines or lost time due to project shut-downs.

Noise barriers are a proven, effective method of combating noise. QuietSite™ Noise Barriers reduce common construction noises by up to half, changing the perceived sound of a 90 lb jackhammer breaking concrete to using a household blender.

Noise reduction barriers supported by fencing. Use to surround generators, cooling and heating systems, or other noise-generating equipment.

Modular noise-reducing panels feature brass eyelets and grommets on tops and sides for easy attachment to fencing.

The NYC Noise Code mandates every construction site have a noise mitigation plan on location. It recognizes portable barriers with sound insulation for mitigation measures. Shown here, Justrite barriers create a sound-minimizing enclosure between a job site and a pedestrian walkway.

Use for indoor renovation projects.

Kits include premium panel, metal frame and metal base.

- Generators
- Air conditioners
- Civil engineering sites
- Night works
- Oil and gas
- Mining
- Demolition
- Any loud equipment outdoors

# High-strength spray coatings for spill containment

High-strength, flexible coatings withstand temperature fluctuations and surface movement while resisting harsh environments

Our spray-applied structural coating systems are some of the strongest in the industry. Backed by over 30 years of experience, our projects provide environmental protection and meet regulatory requirements for our customers throughout the United States, including the U.S. military, USDA, airports, and petroleum industry and power companies.

BCI SC-3900 offers high strength and flexibility suitable for cracked concrete, degraded steel containment systems and other difficult coating applications. BCI CR-3000 is also high strength with good flexibility, but offers higher corrosion resistance.

Spray-on technology coats smoothly to repair cracks and leaks—tack-free in seconds

BCI combines its market leading, patented spray technology with versatile containment options and water filtration systems. Our proven expertise in secondary containment and coatings allows us to offer an expansive portfolio of products and services from a single-source, ensuring the best possible solution tailored to your application, while complying with applicable environmental regulations.

Leak and crack repair

Pipeline repair

**Let our expertise become your peace of mind.**

## Spill containment customized for your specific application

Let our experienced, knowledgeable sales and engineering staff create a solution based on your application requirements. See how we've helped others:

**Background:** A silo with multiple pipes running along the inside wall needed cleaning. There were a number of catwalks with grated decking inside the silo which held equipment and workers that needed protection against any wash water from above.

**Solution:** Basic Concepts designed a round-shaped berm with a cutout to accommodate the piping. Deployed on the upper level, the customized berm captured the overspray and wash water, thereby protecting personnel and equipment from the power washing work above.

**Background:** A customer required a berm that would stand up to repeated usage with a wide variety of equipment. They specified extra puncture and abrasion resistance to increase the longevity of the berm. Rather than ordering track mats as a separate accessory for the berm, they wanted "unfold and go" convenience for quick use.

**Solution:** Basic Concepts built a berm with welded-in track mats, resulting in increased abrasion resistance, quicker set-up, and no worries about keeping track of separate loose pieces.

**Background:** An oddly-shaped, six-sided storage room required spill containment for 55-gallon drums. The customer wanted to maximize storage capacity by utilizing the full footprint of the room.

**Solution:** Basic Concepts designed a customized berm to line the entire drum room for proper secondary containment of the drums.

**Background:** A stationary transformer mounted on a concrete pad required overflow spill protection.

**Solution:** Basic Concepts provided leakproof secondary containment by engineering a berm with a square cutout which included a fluid-tight zipper to wrap around the concrete pad.

Call us today at 1-800-285-4203 for a free consultation to help solve your spill containment issue!

**Custom Containment!**
