

Ground Mats

Product Images

Short Description

- **Enhanced Berm Longevity:** Protects spill containment berms from abrasion and wear, increasing their lifespan.
- **Heavy-Duty Fabric:** Made from durable polyester (PET) with PVC for strength in demanding conditions.
- **Smooth Deployment Area:** Provides an even foundation for easier and more stable berm setup.
- **Puncture Resistance:** Meets ASTM D751 standards, featuring a puncture resistance of at least 85 lb. for reliable protection.
- **Durable Thickness:** With a thickness of 0.065 inches, it enhances longevity and effectively reduces wear and tear.
- **Quick Setup:** Lightweight design allows for easy and efficient positioning.
- **Cost-Effective:** Minimizes the need for frequent repairs or replacements, saving on maintenance costs over time.

Description

Smooth, protective base for spill berms; shields against rugged terrain and debris.

Extend the life of your spill containment berms with our robust ground mats, designed to create a smooth, protective foundation beneath your berms. Crafted from heavy-duty woven fabric, it shields against wear from rocks, debris, and rugged terrain, keeping your containment berm resilient under tough conditions. Easy to deploy and engineered for strength, this ground mat adds a dependable layer of protection, ensuring your spill containment area remains intact and work stays on track.
